

# MTK Bimini Folding Instructions

1. Remove the black twistknobs from the front 90 degree swivel mounts. Remove the leg eyelet from the 90 degree swivel mounts and place the twistknobs back into the mounts.
2. Remove the twistknobs from the front support pole angle mounts on the top section of the tower. Cross these legs on top of each other so that they are facing the sides of the boat.
3. Meet the front legs with the rear legs (you will need to lift the canvas over the ski tow for the rear legs) leaving the rear legs connected to the 90 degree swivel mounts.
4. Roll the fabric with the short front supports inside and place the boot over the rolled fabric.
5. Buckle the boot to the front bar of the header and use the Velcro straps on the rear legs to secure the front legs to the rear legs.
