THANK YOU FOR YOUR BUSINESS. IF YOU ARE NOT COMPLETELY SATISFIED IN ANY WAY WITH YOUR NEW LIGHT BAR, PLEASE CONTACT US. Our entire purpose as a company is to offer great products at affordable prices that our customers love.

Please take a few minutes to read the installation instructions and become familiar with the installation before beginning to ensure a high quality, trouble free installation and use. If you have any questions during your installation give us a call at 877-77-Tower or e-mail Support@MonsterTower.com

Attaching the LED Lightbar to the tower

1. Using a hex key, remove the top two bolts on the top of each round tower mounting bracket.
2. If the lightbar is going on a non-Monster Tower, you will need to replace the existing black plastic inserts with the appropriate size for your tower – otherwise, leave the existing inserts as is.
3. Holding the lightbar in its desired location, have someone re-attach the removed top sections of the tower mounting brackets and tighten all four bolts back into place. *Remember to have the correct plastic insert if a different size was used in the previous step.*

Setting your desired angle

1. Using a hex key, loosen the “**SET SCREW**” on the bottom center of the tower mounting bracket enough to twist the lightbar’s position.
2. Twist the lightbar to be in your desired position.
3. Retighten the “**SET SCREW**” using your hex key to lock the positioning into place.

SET SCREW
